General Information:

The Schnaller Triumph Rocket III Turbo was developed by Juergen Schnaller (Jorge Jamon). At 5,400 rpm, 142 KW are achieved at the rear rim. The Turbo Rocket has an even power development due to an effective tuning of the turbocharging (Garret turbocharger). The chassis was tuned with White Power suspension elements and the brake system comes from the Daytona. The paint job was done with Knud Tiroch from "hot rod hangar". We are proud to offer this Rocket III 2.300 Turbo "Angy Rat" as a one-off.
