General Information:

The Formichino scooter was developed by Donnino Rumi. The aim of the development was to disrupt the market dominance of Lambretta and Vespa. The special metal moulds were produced at a Rumi subsidiary in Bergamo. Our Formichino is in beautiful condition. CEV headlight, CEV rear light, two-piece 8-inch rims, Veglia 0-100 km/h speedometer and handlebars with connected fittings make the Rumi a well-restored classic scooter. Of course, the cloverleaf screws are also installed.
