General Information:

This 351 OSL was first registered in Solingen in 1937. At that time, the owners? occupations were still recorded, and the first owner was a motor driver who bought the OSL for 995 Reichsmark. The overhead-valve engine was easy to operate, as the twist grip had by then become standard on models from almost all manufacturers. The history of our 351 OSL can be traced in full. Over the past 30 years, the machine has been part of a museum collection, where it was occasionally put into operation.
