General Information:

Only at second glance does it become clear that you are looking at a technical treat. Of course, the extravagant paint set (known from the silver Shotgun) is of first-class quality. But the single-cylinder NCR engine is on an identical level. The camshaft has been adjusted so that the torque curve corresponds to that of a street machine. At 127 kg, it is lightweight, 5-speed transmission and a powerful engine make the Ducati fun to ride.
