MOTORRAD

Brand:

BMW

Model:

R 32

First Registration:

1925

Frame Number:

Mileage:

21.913 km

KW (HP) ccm:

6,2(8,5)494ccm

Price:

on request

General Information:

The centrepiece of the R 32 is the M2B33 engine. The special feature was that the engine had a pressure lubrication system. As a rule, the engines of the competition had a so-called loss lubrication system, which had to be regulated by the driver, since the oil was either excreted or combusted. With a low centre of gravity, the BMW R 32 has relatively good road holding. With a top speed of around 100 km/h, the R 32 was able to keep up well in traffic. The BMW R 32 was built between 1923 and 1926. We have german registration papers.
