General Information:

In recent years, we have repeatedly sold Benelli 750 Seis worldwide. The 750 six-cylinder machine has now become a sought-after collectors item. The history of the 750 Sei begins with the famous designer Piero Prampolini, who worked for the Benelli family for many years. In 1972, he and his team succeeded in presenting the first Sei at the Modena Motor Show. The 750 Sei was then built in three different series. A total of 3,204 units were produced. The differences between the individual series are marginal. Our 750 Sei comes from the first series, which is immediately recognisable by the position of the ignition lock. The excellent original exhaust system with its fabulous sound, combined with Borrani rims, make our Sei a very beautiful collectors item, which we are selling ready to ride and with German papers.
