General Information:

The final batch of MV Agusta 850 SS models was generally produced from unsold ?America? models, which is why the chassis numbers were below 221-0100. It is believed that 27 bikes were produced. They can be recognised by their EPM rims, 27mm carburettors, three Brembo disc brakes and a chrome-plated exhaust system. In contrast to models intended for the American market, which were fitted with 26mm carburettors, our 850SS was originally owned by Alberto Armeni, who worked as an engineer at MV Agusta. In recent years, the MV has been owned by collectors and has been ridden regularly.
